

# CORTINO

## Let your blinds join the world of *smart home*

Buy *Rollbox* drive  
and control blinds using  
a remote or smartphone!

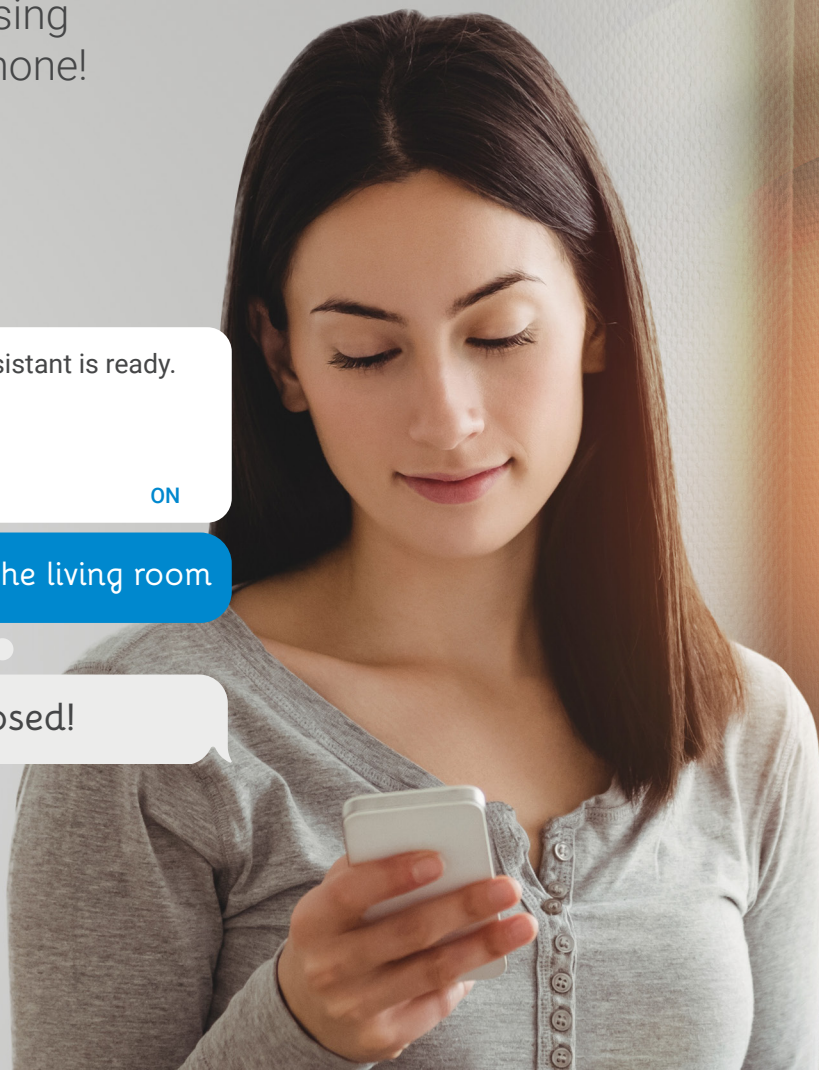

Your Google Assistant is ready.

ON

Close the blind in the living room

Blind closed!

The Rollbox drive for interior blinds with chain system will easily change the covers into intelligent electrical devices that will ensure comfort in your home. This is the first such drive on the Polish market!

### *One solution for all blinds*

The Rollbox drive has been designed to be compatible with the majority of internal blinds available on the market, regardless of shape or size - only the cover should have a chain system.

### *Easy installation*

Very fast assembly that does not require interference in the blind. The drive has a built-in battery, thanks why do not you have to put the cabling and disassemble the blinds. Choose a place to install - it can be a window frame, as well as a wall and screw or glue the holder here. The installation will be done within a few minutes without the help of an installer.

### *Possibility to connect to the YOODA Smart Home 2 system*

In addition to the standard control - any remote control or buttons on the drive, you can control the blinds using your phone or tablet. Add automated blinds to your smart home and thanks to the YOODA Smart Home 2 control unit you will have control over your covers from anywhere in the world. You can set various scenarios that will be activated automatically at certain days and hours or run manually.

One touch you will be able to cover the blinds to protect yourself from strong sunlight during the day. Synchronization with sunrise and sunset will allow you to wake up in natural light and take care of your privacy at night.

### *Security - when you are away*

Thanks to the programmed hours of opening and closing the blinds, we can simulate the presence of house members when we are, for example, on holidays and thus prevent the visit of unwanted guests.
