433 MHz CE In order to fully explore available functions of CAMELEO series please take a moment and read this manual before using the device. CAMELEO transmitters are compatible with all YOODA brand devices.

General information

1. Control:
can control single motor,
or a group of up to 20 motors on each channel

2. Range:
200 meters outdoor,
35 meters indoor

3. Battery:
2 x CR2430

4. Power supply:
3 V

5. Dimensions:
80 x 80 x 14 mm

6. Operating temperature:
10 mW

7. Temperatura pracy:
from 0°C to 50°C

8. Protection degree:
IP 30

Radio receiver range is a variable value and can differ from declared values depending on conditions in which device operates. Possible sources of changes in range are building construction, interference caused by other radio transmitters etc.
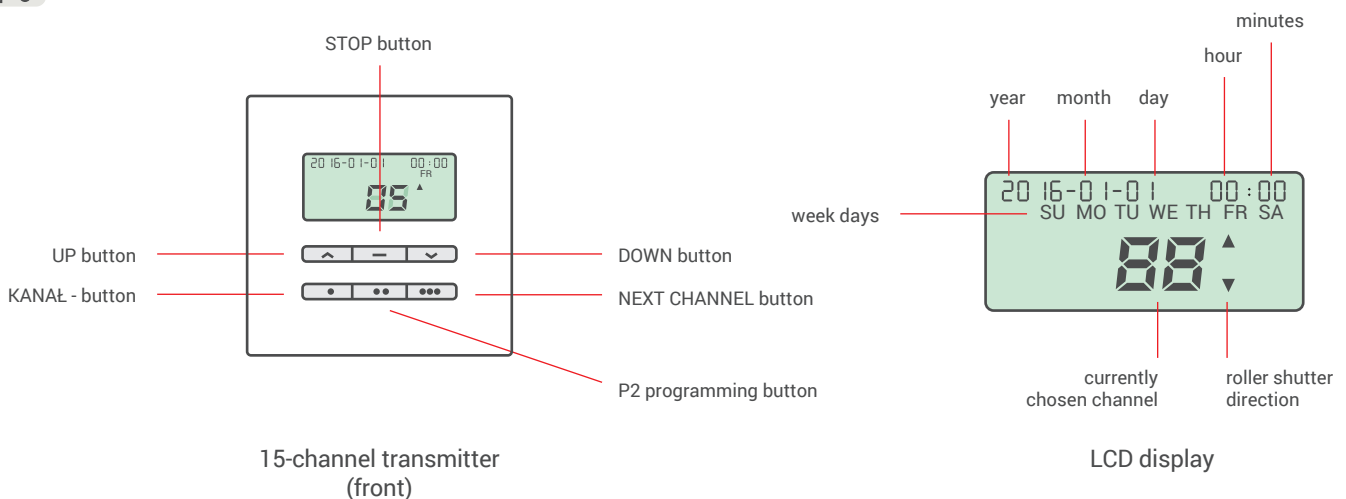

Detailed description

1. Transmitter is equipped with calendar function. Current date and time is being displayed. Transmitter does not have time programming function.
2. To access batteries and mounting holes remove front frame.
3. Estimated battery lifespan is 3 year if the device runs 4 commends a day in average.
4. Batteries should be changed when LED diode stops flashing when channel is being changed or receiving device stops reacting to commands.
5. When placing the battery ensure that polarity is correct.

Batteries contain substances that may be hazardous to health and may pollute the environment. Used batteries should be disposed of properly.
