

433 MHz

In order to fully explore available functions of UNO series please take a moment and read this manual before using the device. UNO transmitters are compatible with all YOODA brand devices.

1. General information

1-channel UNO remote control, white (UNO_1R)

1. Control:
Ability to control the on / off device
2. Range:
200 meters outdoor,
35 meters indoor
3. Battery:
1 x CR2430
4. Power supply:
3 V
5. Dimensions:
50 x 31 x 17 mm
6. Transmitting power:
10 mW
7. Operating temperature:
0°C + 50°C
8. Protection degree:
IP 30

Radio receiver range is a variable value and can differ from declared values depending on conditions in which device operates. Possible sources of changes in range are building construction, interference caused by other radio transmitters etc.

2. Detailed description

1. Estimated battery lifespan is 3 year if the device runs 4 commands a day in average.
2. Batteries should be changed when LED diode stops flashing when channel is being changed or receiving device stops reacting to commands.
3. The transmitter has one button which sequentially sends ON and OFF signals.

Batteries contain substances that may be hazardous to health and may pollute the environment. Used batteries should be disposed of properly.

3. Programming the transmitter for use with remote controlled socket.

1. Pressing the programming button can not be done by using sharp tools.

OK
The transmitter has been saved
In the device memory.

Turn on the power.

Press and hold the programming button for about 3 seconds until the LED diode signals, that the receiver entered the programming mode.

Press once
ON / OFF button.
